

a new approach

the Damion Reid Signature Model

Damion Reid Model snare drum general maintenance instructions:

- Avoid exaggerated tension of the snare wires. Throw-off action should always be smooth and stressless.
- Always keep the snare wires engaged when the instrument is transported in its carrying bag.
- Lubricate moving parts from time to time (throw-off, t-rods)

How to change the resonant head:

1

- put the drum on a flat, soft surface.
- bottom side up.

- disengage snares by releasing throw-off lever (1).

Please note: There's no need to ever unscrew the square-headed locking screws (5)!

2

- remove throw-off snare slide (2) from adjustment rod (3).

3

- remove tension rods.
- raise bottom hoop (4).
- change resonant head.
- reinstall bottom hoop (4).
- reconnect throw-off snare slide (2) and adjustment rod (3).

Throw-Off handling:

Please note:

Avoid applying pressure on adjustment rod when engaging throw-off lever.
